How to find specific collections, authors or photos in MUIS

Searching for a specific collection

Many collection numbers can be found in the overview of ERM photo collection. Let's find Viktor Salmre's collection – from the overview we know that his collection number is 2644. Open Muis search, click on advanced search and set the museum to Eesti Rahva Muuseum.

Searching for a specific author

To find works by a specific author, use the **'Number'** and **'Person'** fields.

1 **In the 'Number' field, type Fk.**

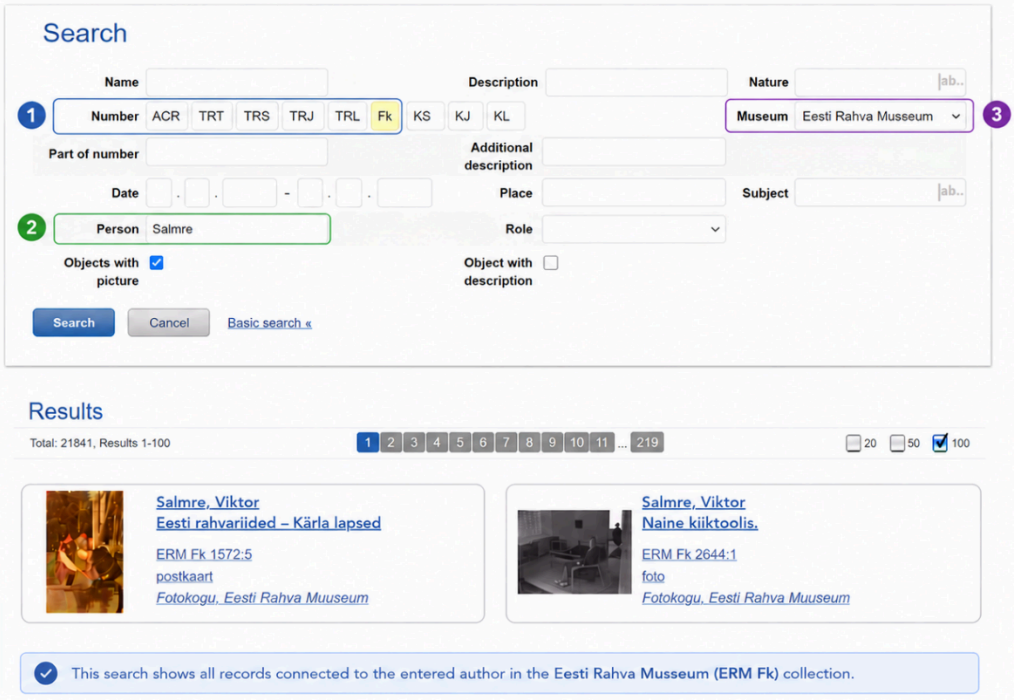

> For all searches in ERM Fk, always type Fk in the 'Number' field.

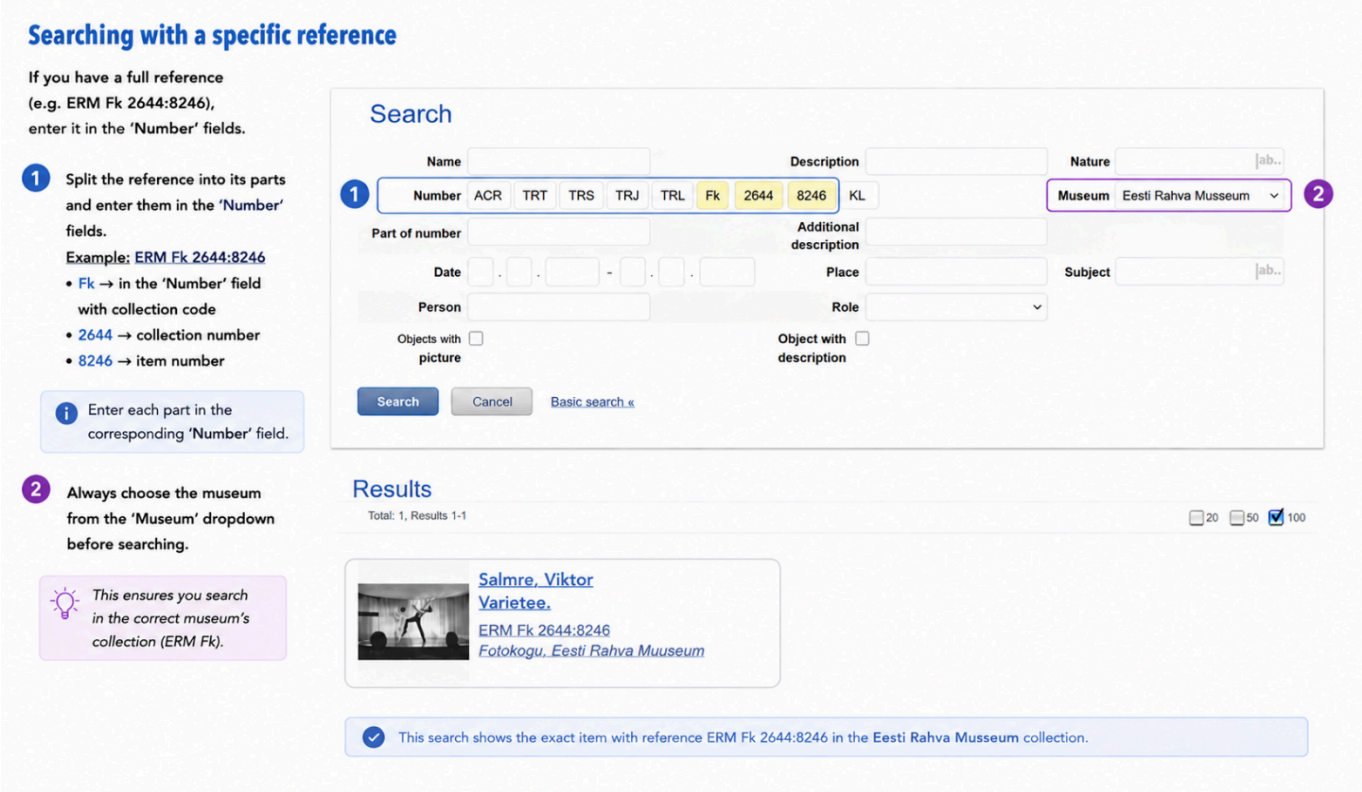

2 **In the 'Person' field, type the author's name.**
You can type the full name or part of the name.
The search will show all records connected to that person.

3 **Always choose the museum from the 'Museum' dropdown before searching.**

> *This ensures you search in the correct museum's collection* (ERM Fk).

> Do not confuse ERM Fk, ERM PM Fk and ERM TM Fk – they are different collections.

In regards to the photos I chose for the first exercise, the references to find them in Muis are in the file name. Like file name **ERM_Fk2644_8246** has the collection code and item number to find it in Muis.
